

**\*\* PERSEUS - A constellation of the northern sky representing the hero of Greek mythology who saved Andromeda from being devoured by the sea monster, Cetus.**

**\*\* (cont.)**

**PERSEID - Meteors: the most glorious meteor shower of the year, producing maximum of as many as sixty meteors per hour on August 12, and 13th each year. They are bright -- many which explode leaving a train.**

**FALLING STARS - Shooting stars are considered to represent human souls, but their movement has various interpretations. Shooting stars are thought to be souls coming back to earth to give life to newborns or to occupy the bodies of mortals; or others believe they are dead souls in route to heaven.**
